

# CONCRETE FLOOR COATINGS

Floors in industrial environments are often neglected. Mostly they are plain concrete with no colour or sheen to them, they are hard to clean and demotivating to the team who work in them. We believe, by sealing them and adding some colour, your team will have an **increase in morale**, the standard of **cleanliness will increase**, they will be **safer** and most importantly **better productivity and quality**.

**Cotewell – Inspiring Team  
Excellence for Industrial  
Workplaces.**

## SYSTEM OPTIONS:

- Concrete dust sealing – internal or external
